## BETTER CHEMICALS FOR A BETTER LIFE

Backed by many years of practical experience in the synthesis of ammonium sulphate and urea, TOYO KOATSU now ranks amongst the biggest fertiliser producers of the world. Its world-wide exports are ever on the increase.

The success of the TOYO KOATSU synthetic urea process is now acclaimed throughout the world.

Various TOYO KOATSU synthetic resins are used for industrial materials and articles of modern living;

its numerous industrial chemicals are employed in many fields such as solvents, detergents, pigments, materials for synthetic resins & plastics and synthetic fibre, and pharmaceuticals. Thus TOYO KOATSU products are the prop and stay for the industry of Japan.

Moreover, the company has succeeded in preparing a new polyurea fibre URYLON which has the advantages of both nylon and terylene. Now it is on the way towards industrialisation.

Enquiries are cordially invited for all the TOYO KOATSU products.

**Main products:** Urea, ammonium sulphate, calcium superphosphate, methanol, formaldehyde, acrylonitrile, sodium cyanide, sodium tripolyphosphate, synthetic resins (urea, melamine, polyester, styrene-acrylonitrile copolymer) & other chemicals.
